CWD- Batch 3- Day 11 Activity (Cards)

# Cards

---

Cards are a convenient means of displaying content composed of different types of objects. They're also well-suited for presenting similar objects whose size or supported actions can vary considerably, like photos with captions of variable length.

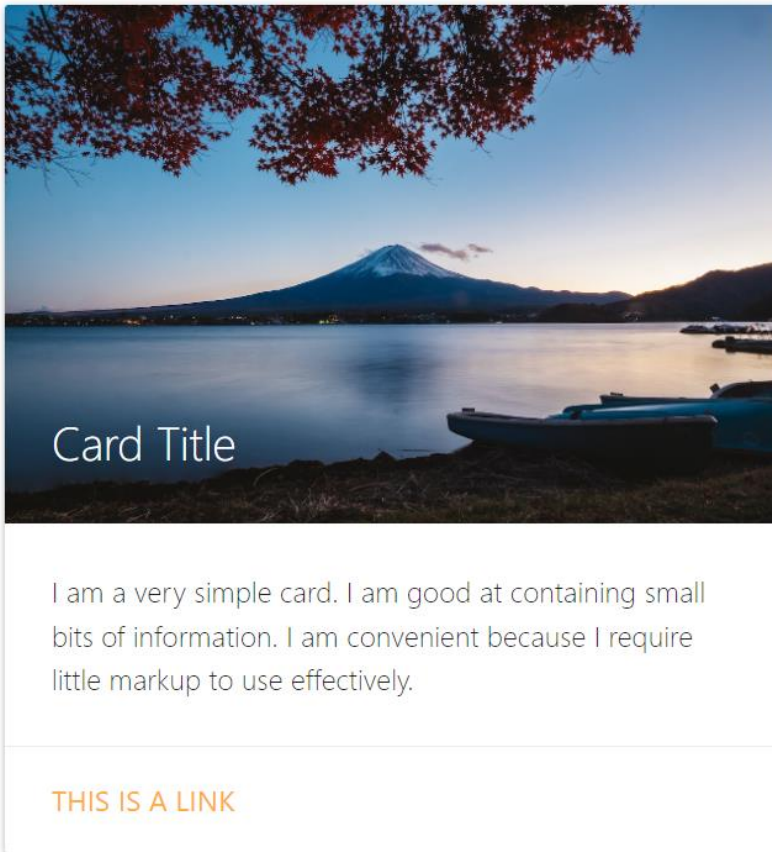

## Basic Card

### CARD TITLE

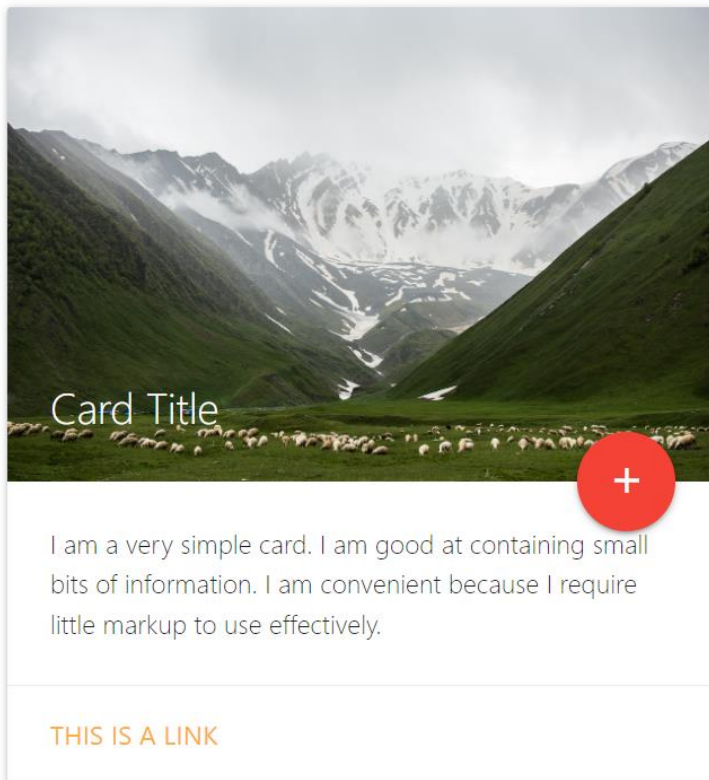

I am a very simple card. I am good at containing small bits of information. I am convenient because I require little markup to use effectively.

Here is the standard card with an image thumbnail.

Here is an image card with a large Floating Action Button.

Here is the standard card with a horizontal image.

Card Title

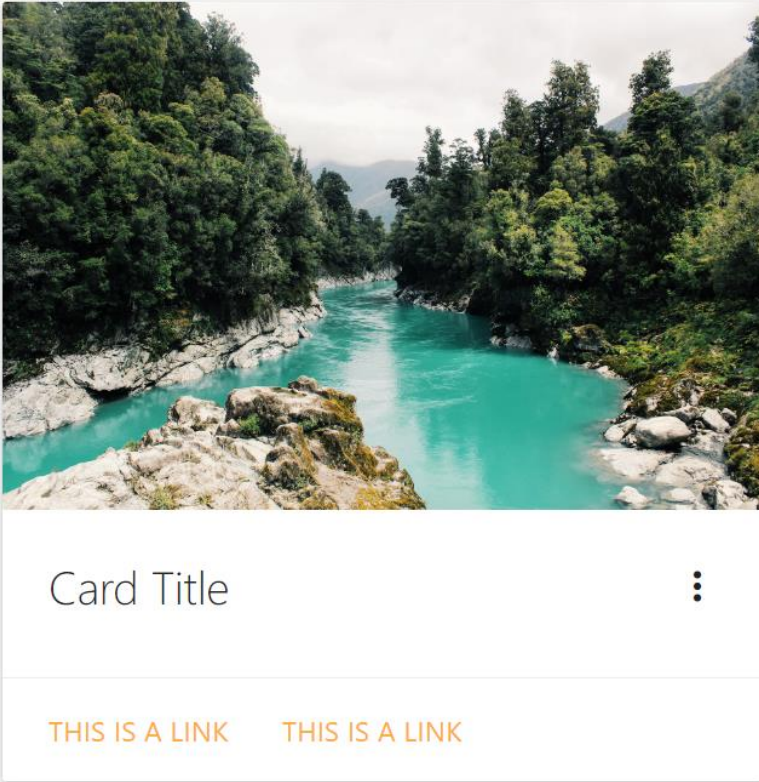

Here you can add a card that reveals more information once clicked. Just add the card-reveal div with a span.card-title inside to make this work. Add the class activator to an element inside the card to allow it to open the card reveal.

Card Title

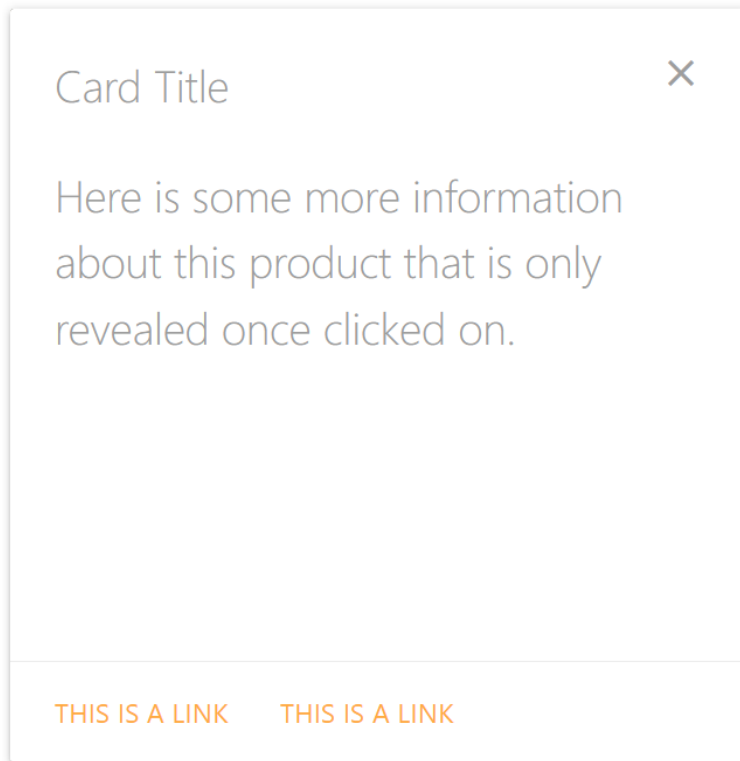

Here is some more information about this product that is only revealed once clicked on.
